

The Pedors Classic MAX

for Swollen Feet and Lymphedema

The Pedors Classic MAX are available in **2E, 4E and 6E** widths and have been designed to accommodate feet at various degrees of swelling with our proprietary Pedoprene upper providing both accommodation and therapeutic compression.

For swollen feet or relatively mild edema, we suggest the extra wide 2E width. For more severe edema or for venous insufficiency we recommend the extra, extra wide or 4E width.

For individuals with lymphedema we recommend the extra, extra, extra wide or 6E width.

In Spring of 2024 the Super Classic MAX in a 10E width will be added to our core wholesale program, specifically designed for severe lymphedema and to accommodate compression wraps and bandages inside the shoe.
